EDUCATION

Hunter College, City University of New York

Aug 2022 – Dec 2025

B.A. - Computer Science, Focus in Human Biology; GPA: 3.4

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, Java, SQL, React

Tools: TensorFlow, React, Git, WordPress, Tableau, PyTorch, HuggingFace Models, Jupyter Notebook

Databases: PostgreSQL, MongoDB, Neo4j, Supabase

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Selenium

EXPERIENCE

Incoming Data Analytics Intern

Jun 2025 – Aug 2025

Memorial Sloan Kettering Cancer Center

Data Science Fellow

Jul 2024 – May 2025

CUNY Tech Prep

- Selected for a competitive data science fellowship with students from across the 11 CUNY senior colleges where Fellows create technical projects using tools such as PyTorch, TensorFlow, SQL, Sci-kit learn, and Pandas
- Participated in weekly courses and learned industry best practices for exploratory data analysis (EDA), feature engineering, data collection and processing, statistical modeling, data visualization, machine learning techniques, data science process, and big data

Technical Operations Intern

May 2024 – Aug 2024

The Bee Conservancy

- Managed customer relations database, ensuring accurate input of partner and donor information to track the distribution of grants and funding totaling hundreds of thousands of dollars
- Leveraged Google Analytics and Hotjar to monitor website performance and user flow, implementing insights that boosted web pages to the top 2 SEO rankings for targeted keywords
- Designed and developed community-focused educational web pages, resulting in 20% increased site traffic
- Built offline survey application with React Native to gather event attendee sentiment and feedback

Sustainability Market Analyst Intern

Mar 2024 – Apr 2024

New York City Economic Development Corporation

- Spearheaded a comprehensive market research initiative focusing on the life sciences sector in NYC, analyzing industry trends and projections to guide strategic investment decisions
- Developed and presented strategic programs aimed at enhancing the growth and competitiveness of NYC's life sciences ecosystem

PROJECTS

EZ-RX-ID | *PyTorch, DeepSeek, LangChain, BGE Embeddings, Computer Vision, Supabase*

Feb 2025 - Present

- Full stack AI application that identifies prescription pills from images and generates medical summaries from queries using an Agentic Retrieval-Augmented Generation (RAG) System
- Trained multiple CNNs to extract pill attributes (shape, color, imprint) and combined their outputs using an XGBoost classifier, increasing top-1 accuracy by 30%
- Designed a QA RAG system using DeepSeek, optimizing context retrieval to improve domain-specific reasoning
- Built a recursive agent workflow to evaluate responses, retrieve additional data, and regenerate outputs as needed, ensuring accurate responses and reducing hallucinations by 15%

Dishcovery | *FAISS, Sentence Transformers, NLTK, TensorFlow*

Sep 2024 - Dec 2024

- Collaborated with a team to design and implement a personalized recipe recommendation system utilizing user preferences such as cuisine, taste, and desired ingredients
- Utilized TensorFlow to build an ensemble strategy combining k-Nearest Neighbors and Approximate Nearest Neighbors, trained on a dataset of 500,000 recipes
- Applied NLP through Sentence Transformers and NLTK to process and generate embeddings, allowing for near-instant querying with vector database
